

# Nature Window Art

A very simple activity using natural colours and recycled sweet wrappers.

Collect as many natural colours as you can, get creative and look for petals, berries, grass, leaves and anything else you find.

Remember, only choose fallen leaves and petals.

Find a coloured sweet wrapper.

Draw a shape of anything on some card, ideally something with a circular focal point, the middle of a flower, the eye of a dragon etc.

Cover the drawing with glue and stick the different coloured petals etc wherever you like on the picture, then leave it to dry.

Ask an adult to cut out your drawing and also the focal point.

Turn it over and use glue to stick the coloured sweet wrapper over the hole.

Stick your drawing on your window. Watch as the sun lights up your circular focal point as it shines through.
